Muhamad Taopik

Automation & Backend Developer | APIs, Data Pipelines, Web3 Integrations

Bandung, West Java, Indonesia

Summary

As a Web3 Developer at Farcaster, I contributed to the delivery of 24+ production-grade Web3 projects, generating over \$9,500 in value through competitive bounties. My work involved building Farcaster Frames, implementing cross-chain transaction flows, integrating APIs and on-chain data using tools like Neynar, Airstack, and GraphQL, and developing robust automation and data pipelines.

With a Bachelor's degree in Informatics Engineering from Universitas Islam Negeri Bandung, I bring technical expertise in APIs, data pipelines, and Web3 integrations. My approach emphasizes fast execution, clean, maintainable code, and building reliable systems that scale effectively. I am dedicated to transforming complex challenges into efficient, production-ready solutions.

Experience

Farcaster

Web3 Developer | Farcaster & On-Chain Systems

March 2024 - August 2024 (6 months)

[Farcaster.xyz](https://farcaster.xyz)

Delivered 24+ production-grade Web3 projects through competitive bounties, generating over \$9,500 in value.

Key work includes:

- Built Farcaster Frames for payments, minting, and social interactions
- Implemented cross-chain transaction flows and on-chain integrations (Base, ETH, DEGEN)
- Integrated APIs and on-chain data using Neynar, Airstack, and GraphQL
- Developed automation and data pipelines for real-time and batch processing

Worked across fast-paced environments with strict deadlines, shipping production-ready systems — not prototypes.

PTIPD UIN Sunan Gunung Djati Bandung
Back End Developer
June 2022 - January 2023 (8 months)
Bandung, West Java, Indonesia

Politeknik Pos Indonesia
Information Technology Intern
January 2018 - March 2018 (3 months)
Jl. Sari Asih No.54, Sarijadi, Kec. Sukasari, Kota Bandung, Jawa Barat 40151

Education

Universitas Islam Negeri Bandung
